ANYONE CAN DO IT

Caliber goes smart

Imagine...

The doors and curtains close when you leave your house and the lights outside go ON?
Remote control your lights or keep an eye on your house?
A smart home can make your life a lot easier thanks to smart devices that you can control from your smart-phone or tablet.

With 'Caliber smart home' products you can be sure **everything is controllable with ONE App**. We chose to partner with Tuya®, a platform for smart home products which allows great control; not just ON and OFF but a whole range of possibilities.

ONE App Solution

CALIBER SMART HOME

- EXPLORING THE APP -

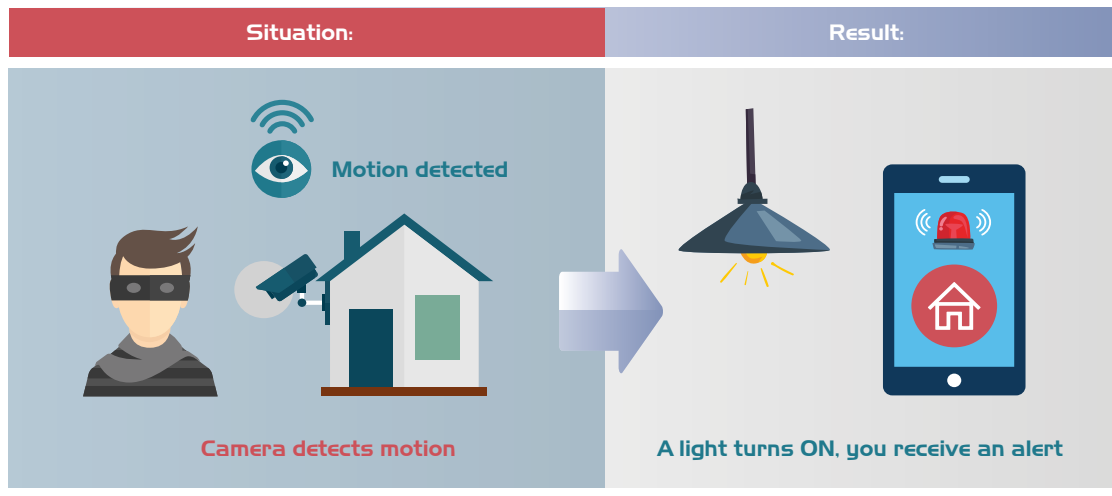

Featuring

All the advantages of Caliber Smart Home.

Find out all the possibilities in this brochure... Once you have installed and arranged all the settings, you can share settings between devices. Saving you the trouble of having to set everything over and over again. With the convenient options, you can let your smart equipment react to situations. E.G: letting the curtains close when it's hot outside • let the lights go ON when the security camera detects motion, so that it looks like you're at home. The possibilities are endless.

Visit our website to explore our growing number of smart products that can make your home more comfortable. Control the lights, cameras, kitchen equipment, curtains, locks, climate control, vacuum cleaner or anything connected to a smart switch. That's right, you can even 'built' your own smart devices.

Scenario example

Always Connected

All-in-one

All 'Caliber smart home' products work with the same App. No more switching from App to App to find the right light switch. The App works on phones & tablets and there are physical switches and control panel(s) available, that can be built in your home/office.

Wi-Fi connectivity allows you to remotely control your smart devices with your smart-phone from wherever you are in the world (internet connection required). Just imagine, you are on vacation, someone is at your front door and you can see who it is, and talk to them.

Combine products

One of the main advantages of 'Caliber smart home' is that all of our products can be controlled with the same App. Even (Tuya) products from different brands can be added in the App.

Voice control The future is here

Making schedules, scenes & scenarios

Discover the convenience

Schedule smart devices in your home or office to turn ON or OFF at specific times. No more wondering if you left the coffee pot or clothes iron ON. And you no longer need to worry about walking into a dark house or if your house looks empty while you're on vacation. Your home can become more secure, more efficient and easier to control.

With the scenes functions you can program certain tasks for set conditions. You can program the lights to turn ON when it becomes dark or turn ON the De-humidifier when the moist is above average. Or let the porch lights go ON when the doorbell camera detects a visitor.

The profile feature allows you to add members to your household and share settings. This is convenient if you have set everything up; lights switch at certain times, doors locking, curtains closing, etc. And now someone moves in with you, or someone of the family has a new phone. Saving you the trouble of having to assign and program every smart device time and time again.

Grouping devices can save a lot of trouble. The 'Caliber smart home' App lets you 'group' devices so they can be controlled per room for instance.

Scenarios can provide a helpful feature if you want certain things at once.

You can set scenario's like: 'bed time' which turns OFF all the lights, closes the curtains and lowers the room temperature. All programmable according to your wishes.

No more waiting for coffee in the morning or worrying you left the doors unlocked. Now you can make programs that do that with a single press on a button.

Voice control

Voice control options allow you to use Alexa, Siri, or Google Assistant to control smart devices (some models might require a bridge or dongle for this capability). Please consult the App for instructions on this option.

Security & cloud storage

Our smart home devices are hacker proof.

The 'Caliber smart home' App with it's hardware components are continually tested and updated, therefore they are more secure with every update. Some early smart home devices in the past had a protocol that was safe when it came out, but over the years hackers have become better at their 'job', leaving these products vulnerable for corruption. With 'Caliber smart home' you can be sure, hackers cannot get into your network through our smart home devices.

In the near future we'll offer on-line storage for your camera footage so you'll never lose a single clip. It can be months before you find out you want to review what your camera saw on a specific date & time. With a loop recording on a small memory card, changes are the recording of just last week will be overwritten.

Another great advantage of our cloud service is that settings, scenario's etc. can be stored. So there's no problem when you lose or damage your phone.

Free registration with your email address or mobile phone number.

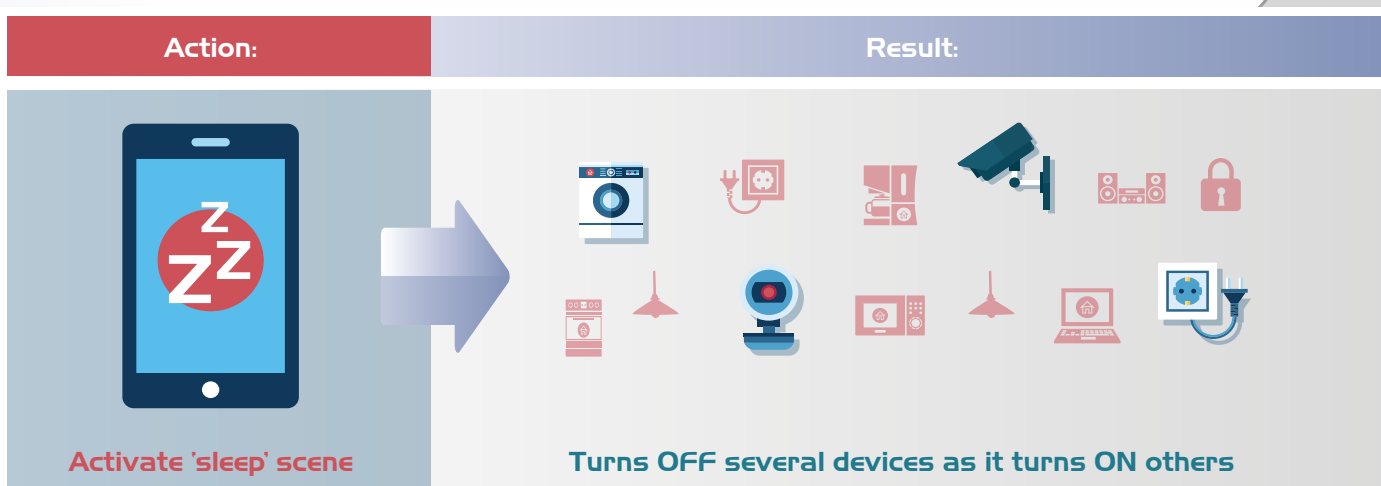

Tuya

We chose to partner with Tuya, a platform for smart home products. They make sure it works and it is safe, we produce the smart products.

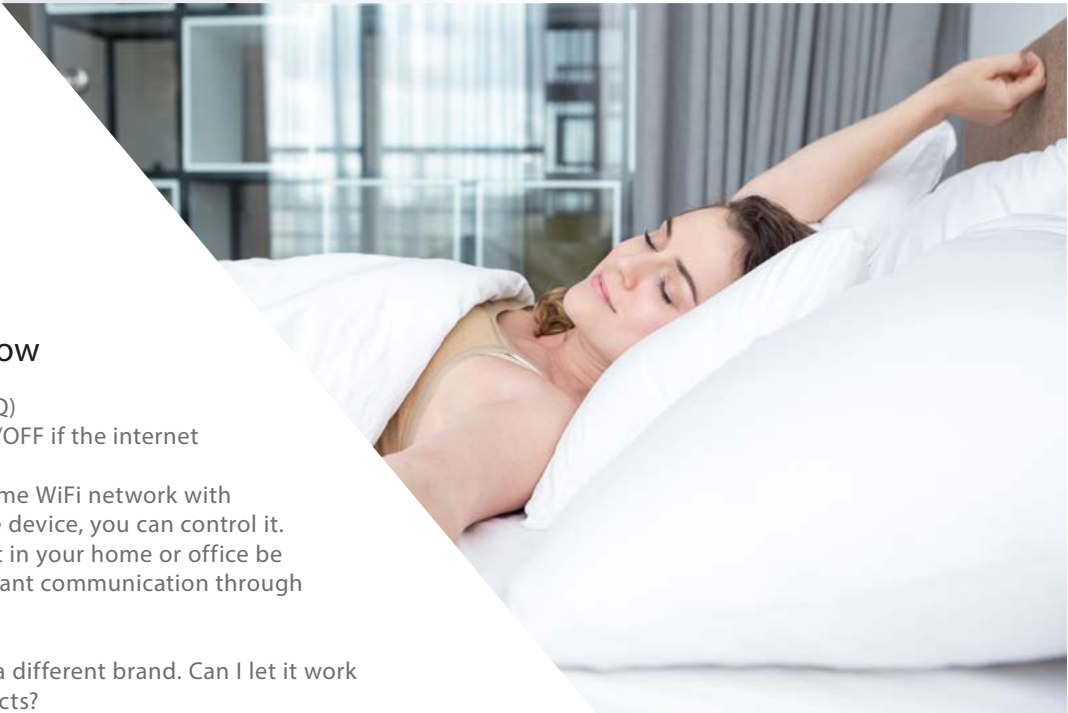

Products that are compatible with the 'Caliber smart home' App will wear the 'Powered by Tuya' icon.

Everybody in Sync

F.A.Q

What we really want to know

Frequently asked question (FAQ)

Q: Can I still turn the lights ON/OFF if the internet connection fails?

A: Yes, When you are on the same WiFi network with your phone and smart home device, you can control it. However should the internet in your home or office be off-line, there can be no distant communication through the use of internet.

Q: I bought a smart bulb from a different brand. Can I let it work together with Caliber products?

A: Yes, if it is powered by Tuya you can. If it is another platform, it might not be compatible.

Q: Is it safe? Can no one break into my home network?

A: Yes, Caliber smart home is perfectly safe and ISO certified. We claim Tuya smart has passed GDPR compliance verification and got approval of ISO27017 (Cloud security) and ISO27018 (Cloud privacy) by SGS on 25th of may 2018

Q: Will updates be installed automatically?

A: The App store or Google play store will notify you as soon as an App update will become available. If there is a firmware update for devices, the App will let you know. We strongly advice to install those updates.
