

MOTIP Hydraulic Valve Lifter Treatment

Ord.-no.: 090612

Technical Information

Restore the function of hydraulic valves in the car engine with MOTIP Hydraulic Valve Lifter Treatment. Hydraulic Valve Lifter Treatment contains a high-performance package of effective additives for improved high-pressure properties, as well as wear and tear protection for all types of engine oils.

Quality & properties

- A highly concentrated additive that is developed to restore efficient working of hydraulic valve lifters
- · Eliminates disturbing rattling noise
- Reduces wear and tear due to optimized lubrication
- Compatible with all mineral, synthetic, singleand multi-grade oils and suitable for regular and low SAPS applications
- Suitable for diesel- and petrol engines with and without turbocharger

Physical & chemical data

Colourname: Transparent
Flash point: >100 °C

Content: 300 ML

How to use

- Before use, carefully read the directions on the packaging and act accordingly.
- Check engine oil level before application.
- Add to the warm engine oil after every oil change or whenever required.
- Works during operation. 300ml is sufficient to treat 5 liters of engine oil. For larger volumes add 60 ml of the
 product per liter of engine oil.
- · We recommend cleaning the oil system with Engine Oil Flush before application.

Environmentally sound

European Aerosols is committed to apply formulations without restricted or critical ingredients and to achieve best possible performance. The caps and packagings are made of recyclable material.

Disposa

Only the completely emptied cans should be put into the recycling skip or appropriate container for reclaimable refuse. Cans which are not empty should be disposed off as "special refuse".

Marking/Labelling

All products made by European Aerosols comply with the actual labelling regulations according to Preparation Guideline 1999/45/EG. All aerosols correspond to TRGS 200 and TRG 300 as well as to aerosol guideline 75/324/EWG in the actually valid version.
