How to use

- Before use, carefully read the directions on the packaging and act accordingly.
- The surface must be clean, dry and free of grease.
- The aerosol should have room temperature. Best processing temperature 10 to 25°C.
- Before use, shake the aerosol for 2 minutes and spray a sample.
- Apply the marking spray in the desired width.
- After use, clean the valve (hold the can upright and press the nozzle for approximately 5 seconds).
- The drying time depends on the ambient temperature, the humidity of the air and the thickness of the lacquer applied.
